CREATE YOUR OWN PNR

Follow the steps below to create a basic PNR. This is to give you an overview of what you will be learning in the remaining chapters in this section. Remember to depress the Enter Key after typing in the data shown in the ENTRY column. See the sample responses on the following page.

**Note: While training, you should not end transact a completed PNR. You should enter I to ignore the record before moving on, unless you are able to use a “training” mode, not a live GDS. If you did end the record, you can cancel the flight (XI) and then end the record again to send the cancel message to the airline.**
**LOW FARE FINDER**

*LEARNING ADVICE*
Create this PNR and price it with Low Fare Finder. Compare current pricing with the information in the response below.

HOTEL SELECT

Hotel Select has a variety of reference systems that allow you to quickly learn and utilize the system. Learn the system by reading the information stored in the HELP, INFO and GRS systems.

BOOKING A HOTEL ROOM IS A SIMPLE FOUR-STEP PROCESS

- Request a Hotel List - from itinerary segment or with no air booked.
- Access Property Availability - from Hotel List to view specific rate planned room description information.
- Display Hotel Rate Rules - from Availability to determine guarantee, deposit and cancellation penalty requirements.
- Sell from Rate Rules.

ABOUT HOTEL RESERVATIONS

Now that you have a quick overview of the 4-step process, study each of the following references. While the process is simple, you will need to know the product of hotel accommodations, the various options, the codes and the resources available in Worldspan®.

LEARNING ADVICE

Pull each of the following references. Make your personal notes regarding information found in each of these references.
